FSSAI

OUR QUALITY PHILOSOPHY

Farm to Export — Zero Compromise

Quality Built Into Every Process

01

Responsible Sourcing

Traceable farms, GMP-compliant suppliers, raw material pre-verification.

02

Precision Processing

Spray-dry & dehydration lines with SOP controls and batch documentation.

03

In-Process Quality Checks

Moisture, microbiology, particle size verified at every critical stage.

04

Final Laboratory Release

Third-party & in-house testing before every export shipment.

05

Export Compliance

Aligned with FDA, EU, FSSAI, Halal & Kosher market requirements.

QUALITY ASSURANCE FRAMEWORK

Comprehensive Quality Management System

Raw Material Verification

Supplier audits · COA review ·
Moisture & microbiological screening
pre-intake

Processing Controls

Temperature monitoring · Batch
segregation · CCP documentation at
every stage

Laboratory Testing

In-house NABL-aligned lab · Microbiology · Heavy metals ·
Pesticide residue

Packaging Inspection

Seal integrity · Label compliance · Moisture-barrier verification · Batch
coding

Export Compliance

Pre-shipment inspection · Regulatory dossier · Country-specific
compliance check

INTERNATIONAL CERTIFICATIONS

Compliant. Certified. Export-Ready.

FSSC 22000

Food Safety System Certification

Global food safety management standard for manufacturers and processors.

ISO 22000

Food Safety Management

International standard for food safety hazard control across the supply chain.

HACCP

Hazard Analysis & Critical Control

Systematic preventive approach to food hazards covering all production stages.

GMP

Good Manufacturing Practices

Ensures products are consistently produced and controlled to quality standards.

Non-GMO

Verified Non-GMO Ingredients

All raw materials sourced and verified as non-genetically modified organisms.

FSSAI

India Food Safety Authority

Registered and compliant with India's apex food safety regulatory body.

TESTING & VALIDATION

Advanced Laboratory Testing Parameters

- ✓ **Microbiology**
TPC, Yeast & Mold, Coliforms, Salmonella, E.coli
- ✓ **Heavy Metals**
Lead, Cadmium, Mercury, Arsenic — ICP-MS analysis
- ✓ **Pesticide Residue**
Multi-residue screening per EU/Codex limits
- ✓ **Moisture & Water Activity**
Aw analysis for shelf-life and stability assurance
- ✓ **Particle Size**
Laser diffraction verification for flowability
- ✓ **Shelf Life Studies**
Accelerated & real-time stability testing

MANUFACTURING EXCELLENCE

Controlled Environment · SOP-Driven · Fully Traceable

Hygienic Production

ISO-class clean rooms
Positive pressure zones

SOP-Driven Operations

Documented procedures
Operator accountability

Batch Traceability

Full upstream/downstream
traceability per batch

Temperature Controlled

Spray-drying precision
 $\pm 1^{\circ}\text{C}$ process control

PRODUCT QUALITY CONTROL

Consistency Across Every Batch

STEP 1

Incoming Sample Retention

Every raw material batch is sampled, retained, and logged with COA verification.

STEP 2

In-Line Quality Checkpoints

Critical checkpoints at pre-processing, mid-processing, and post-processing stages.

STEP 3

Finished Goods Testing

100% batch-level testing before release — no exceptions, no compromises.

STEP 4

Documentation & Traceability

Digital batch records with full upstream traceability maintained for 5 years.

READY FOR GLOBAL MARKETS

Export Compliance & Global Standards

USA

FDA 21 CFR compliant

European Union

EU 1881/2006 standards

UAE / GCC

Halal certified exports

Australia

FSANZ compliant

Japan

JETRO specifications

Singapore

SFA approved supplier

35+ Countries Served

12+ Years of Export Excellence

Pre-shipment inspection on every order

Country-specific regulatory documentation

Phytosanitary & fumigation certificates

Private label & custom formulation available

PERFORMANCE YOU CAN TRUST
